Kent R. Thielen, MD, CEO
Mayo Clinic Jacksonville
4500 San Pablo Rd S
Jacksonville, FL 32224

Doctors Farrugia and Thielen,

I'm addressing this letter to each of you as a concerned citizen. I would greatly appreciate your answers to my questions.

Through various news stories I'd learned of the sad plight and demise of Mr. Daniel Pisano and the tortuous battle his now grieving family had endured with your hospital. I have but a few simple questions and I'll indeed be impressed if you have the courage to humble me with your answers. As follows:

1. Why wouldn't the Mayo Clinic accept the offer of a complete liability waiver from the Pisano family in exchange for allowing the family to attempt any means possible to save the life of their beloved husband and father if it was apparent that treatments adhered to by the Mayo Clinic were not effective?
2. Why did the Mayo Clinic mount such a vigorous legal battle against the wishes of the Pisano family so to disallow any alternative treatment for Mr. Pisano? What was hoped to be gained by the Mayo Clinic?
3. With numerous credible worldwide studies of the effectiveness of Ivermectin for reducing Covid-19 symptoms and mortality rates by up to 75%, why wouldn't the hospital consider the possibility of using this drug in attempt to save Mr. Pisano's life?
4. How much federal funding has the hospital received or will the hospital receive resulting from Mr. Pisano's stay, use of ventilator, and consequent death from Covid-19?
5. Do you consider it your hospital's mission and top priority to save lives?
6. How do you and your management team feel about this matter now that Mr. Pisano has succumbed?

Six simple questions for you to answer and I've even included a self-addressed pre-posted return envelope for your convenience. I'm one person however I'm certain I'm representative of millions of Americans that have these same questions for you.

Why did a once prestigious medical facility as the Mayo Clinic do everything in its power to thwart a family's attempt to save the life of someone deeply loved? Why would this happen with any patient at

the Mayo Clinic? I make no judgment as to right or wrong but I'm struggling to understand the reasons why? I pray one or both of you are men of courage willing to respond.

Sincerely,

A handwritten signature in black ink, appearing to read "Stuart Rosenbaum". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
