27 October 2021

Senator Rand Paul  
167 Russell Senate Office Building  
Washington DC, 20510

Dear Senator Paul,

Thanks for your work exposing the truth about the Wuhan Lab, Fauci and the NIH. Because you're on the short list of conscionable Senators I'd like to address another matter that begs investigation for truth, the matter of vaccine mandates and passports and how they relate to actual vaccine safety. With a growing number of oppressive mandates and passport requirements being issued, I'm concerned with the trajectory that these mandates propel our nation. These mandates are dangerous and immoral. They're based on lies, as the vaccines don't stop the spread, nor stop one from contracting the disease - per Fauci, the NIH and CDC. And, to force Americans against their will to receive any medical treatment with known potentially dangerous side effects by threatening their livelihoods is an immoral affront to human rights.

When mayors, governors, and the President mandate private companies to enforce vaccination against the employees' will they put companies in impossible situations choosing between employees and government. For politicians to be willing to **FIRE** our heroes- military, police, first responders, and nurses regardless of time on the job or the number of lives saved, regardless of their human rights and concerns over the safety of a new *biotechnology*, it's downright **insidious** and **corrupt**.

To date, there are **17,437** reported post vaccination deaths on the **CDC's VAERS** system. The year's not over and that number is **28 times** greater than any amount reported back to 1990. Thus far this year, there's over **818,000** reported adverse events, **83,000** hospitalizations and more than **92,000** urgent care visits. While this is happening, other effective treatments are suppressed by the media, government, and medical community. First responders often called to the scenes of these reactions would naturally become vaccine hesitant. Numerous medical opinions and reports indicate that the majority of adverse events are never reported to VAERS due to a lack of time, resources or knowledge of the system.

To continue parroting the lines 'safe and effective' with these numbers- reported by our own government **is a crime against humanity**. To force people with the impossible decision of the jab or the job is government tyranny. Any deaths related to vaccination by coercive mandate is nothing less than **GENOCIDE!** The senate holds numerous hearings and there should be one on the true **VAERS** data and how much of it is suppressed from getting on the system. Senate investigations into this matter, even if just proposed, will put pressure on all government entities that want to force vaccination based on lies. I hope you also consider introducing a bill that makes it illegal to fire an employee based on their vaccination status.

Our country is suffering from a plethora of maladies, but this now **is a red-hot political topic**. If we lose thousands of police officers, first responders or even truckers, the economic fall-out could take a decade or more to recover from- regardless of who's in the White House. Large groups are forming to fight these mandates, including ours in Florida- **NOT ON OUR WATCH!** These include many vaccinated and unvaccinated that see a bleak future for our country if we don't stop this madness. We look to you as a leader. You're not just Kentucky's senator, you're all of ours and your causes have been righteous. Please make this one of them and let's stop this together before it really gets out of hand. We owe it to our heroes, our nation's citizens and those who have already suffered or died from effects of the vaccine and paved the road of truth for all of us.

Sincerely,

A handwritten signature in black ink, reading "Stu Rosenbaum". The signature is written in a cursive style with a long horizontal flourish extending to the right.
